I'm very excited being here in Beykoz University. We have lots of clubs that you can socialize, from diving to football, from history to theatre, dance and so on. I recommend you come to our family and be a part of it. Our teachers always help us in any situation if you have a problem about the courses, anything else, in your normal life or educational life. They are always there for you.

Teachers always try to help. We can go to the museums or spend time here or other places, also here some dance clubs and there is a lot of clubs I know, like movies and something like this. Turkish people and Turkish students will always understand your situation and be very kind and helpful. Also, for me, Turkey has a good level of education.

I made many good friends who are ready to help me at any time. I really appreciate the hospitality of people at this University. My suggestion for those students who want to come to Turkey and Istanbul is to study at Beykoz University because this university is very new and there are so many different courses and subjects that you can choose. The students and all the teachers are very friendly.

The admission was really easy. The International Office were fabulous, amazing actually and the professors here. They actually help you, they support you and they are always there for you when you need something. My advice, if you guys heard or someone told you about Beykoz and you're still hesitating to come here, I'll say don't do. As if students and teachers over here we're like a big family, so my advice is come here, and I'll be waiting for you guys here.

Abdullahi Farah Abdi

England

We have here international staff who completely speaks English, introducing the university and helped me transfer all my credits to this new university. I'm really happy studying here as the programme is completely in English and the staff is very helpful. As coming to Turkey, it was really nice to find out how easy it is to commute to university using public transportation which is really affordable for students. The food here is wonderful, it's really like home and I enjoy my life here.

Turkey is a nice country to be as a student and in the business world. Turkey is a place which has very different cultures. I'm coming from Africa, I have experienced a different culture, different cultures actually, of the World and I get to associate with the different people from different countries. I experienced different foods, different ways of dressing. If you know Istanbul, it's the city never sleeps, you can be up all night, partying with your friends.
